Request for Clarification and Response

6. Regarding After-care services, what is the full length of time individuals are housed at LIFE Tech? How long is the vendor required to provide After-care services upon completion of outpatient services?

Most residents are housed at the program for six to seven months, depending on contact hours for education. After-care treatment duration will be based on the individualized case plan established by the treatment provider. Depending on the case plan, aftercare may last the full duration of the program. We recommend the use of programs such as AA/NA or Celebrate Recovery for after-care treatment programming. A detailed explanation of services should be included in your proposal.

7. Is the vendor responsible for providing random drug testing or is that a function of LIFE Tech?

Drug testing and the costs associated with testing are the responsibility of the staff of the Board of Pardons and Paroles.

8. In addition to the Clinical Program Director and the Counselors, is the vendor still required to hire a mental health technician?

The vendor is required to provide individual counseling, crisis referrals, and prescription services for individuals with a mental illness, as applicable. These services may be provided by a sub-contractor or on-site qualified treatment staff. The use of telemedicine and telepsychiatry services may be used. A detailed explanation of services should be included in your proposal.

9. Will ADPP provide recidivism reports on participants completing the program?

Yes.
